PROFESSIONAL EXPERIENCE

Front-end Developer (React js)

About me :

- I have over a year of experience as a Front-End developer, with strong skills in creating responsive and visually appealing websites.
 - I possess strong leadership abilities and effective time management.
 - I am always committed to maintaining the highest professional standards.
 - I work efficiently under pressure and deliver tangible results in every project.
 - I continuously strive to improve my skills and bring innovation to the work.
 - I am dedicated to fostering collaboration and teamwork in any team I join.
 - I own a YouTube channel called "Yalla Code" where I share educational content about programming and Front-End development.
 - I plan to increase the frequency of video uploads regularly in the upcoming period.
 - I aim to provide high-quality content that helps developers learn the latest technologies.
-

SKILLS

Html & Html5

css & css3

Bootstrap

Tailwind css

Material ui

JavaScript

React

Hooks

Git & GitHub

PROJECTS

Ecommerce Website

Live Demo : <https://online-shop-jjc4.vercel.app/>

GitHub Repo: <https://github.com/Mahmoud-Habib55200/Online-Shop>

- I developed the project using React, implementing a sign-in and sign-out system along with input validation to enhance user experience.
-
- I implemented a login and registration system with input validation using Tailwind CSS, as well as features for password recovery and reset.
- I designed a shopping cart system that allows users to easily add and remove products, with a function to calculate quantities and prices based on user selections.
- The project aims to deliver an enjoyable and effective shopping experience, focusing on appealing design and usability while improving performance using techniques like Lazy Loading and Optimized Images.

Amazon Clone

Live Demo :<https://amazon-clone-eosin-delta.vercel.app/>

GitHup Repo: <https://github.com/Mahmoud-Habib55200/Online-Shop>

- I developed the project using React, implementing a sign-in and sign-out system along with input validation to enhance user experience.
- I utilized APIs to retrieve data effectively and relied on the Tailwind CSS library to design a professional and visually appealing user interface.
- I designed a shopping cart system that allows users to easily add and remove products while providing clear details about each product.

Youtube Disney

Live Demo :<https://fire-10608.web.app/>

GitHup Repo:<https://github.com/Mahmoud-Habib55200/dummy-youtube-distney>

- I used React, React Hooks, and Redux Toolkit in this project to provide effective state management and a seamless user experience.
- I relied on Firebase to facilitate authentication and securely store data.
- I used Firebase's database to efficiently manage information and data related to users and products.

Design By Bootstrap

Live Demo : <https://resturanat.vercel.app/>

GitHup Repo : <https://github.com/Mahmoud-Habib55200/Resturanat>

- I developed a restaurant website using React, focusing on creating a dynamic and user-friendly interface.
- I implemented a responsive design that adapts to all screen sizes, ensuring an excellent user experience on smartphones, tablets, and desktops.
- The design is highly professional, reflecting the restaurant's identity and attracting customers through an appealing and seamless visual interface.
